I also will miss this call. I've created a list of the studies in the table provided by John with HERO numbers so that it can be formatted to create a reference list. My endnote software is having problems, and although the problem has been identified, it won't be fixed until next Tuesday. I can create the list then if that isn't too late, or someone else will need to volunteer. Others may want to check the references to make sure I chose the right one (Sue, Andrew, John). There were a few instances where I needed to use my best informed guess. Also a reference to the supplemental material needs to be added to the manuscript.

Barbara

Thank you for providing these comments. I am rushing to a dental appointment, so I will look at them when I return. Glad to have you on the team!

John

Hi John et al.

I'm sorry I may not be able to make today's meeting, but I gave the document you sent around earlier another read-through and have a few additional suggestions for minor edits/additions for the group to consider. I think the draft is very well written and that what you suggested at our prior meeting should fully address the reviewers' concerns. I didn't comment on the response to comments, as I was already in pretty close agreement with what you suggested.

Thank you for including me!
-Andrew

Subject: Exposure Quality Manuscript

Please look over these two documents before our teleconference this afternoon. Changes to the manuscript are in TRACK. Responses to the reviewers are in red text. Things that I still need to do are described in green text.

John Whalan
